◆ PROFILE

Developer with 2+ years of experience in full-stack web development and data engineering. MSc Cyber Security candidate at FH St. Pölten. Specialises in C# / .NET, REST APIs, SQL, and hands-on security operations.

◆ SKILLS

Languages

· C# / .NET / ASP.NET MVC
· Python · Java · JavaScript
· SQL · Bash · Linux

Data & Automation

· Docker · GitLab · SSIS
· REST APIs · LDAP · SSMS
· Vmware · Excel · Power BI

Security Tools

· Kali Linux · Nmap · Metasploit
· Burp Suite · Hydra · SQLMap
· Wazuh · ELK · OpenVAS
· Wireshark

Method

· Agile / SCRUM

Frameworks

· ISO 27001/27002/27005
· OWASP Top 10
· CIS Controls v8
· MITRE ATT&CK · CVSS · STRIDE

◆ WORK EXPERIENCE

Web Developer / Data Engineer

Oct 2024 – Jul 2025

► OTP Bank · Tirana, Albania

- Developed C# / .NET internal apps including a dynamic contract generator auto-populating legal templates with client data.
- Built SSIS ETL pipelines for automated data manipulation, email/SMS dispatch, and reporting workflows.
- Used Power BI to support banking reports and data visualisation, working with structured business data to prepare and present reporting insights.
- Parsed Excel and PDF files into SQL Server; designed and normalised multiple databases for new features.
- Designed REST APIs for enterprise integration: LDAP auth and automated JIRA task creation from parsed PDFs.
- Containerised and deployed with Docker; managed version control and CI/CD via GitLab.
- Optimised complex daily SQL transaction-summary queries, significantly reducing execution time.
- Collaborated cross-functionally with legal, IT, and operations on business and regulatory alignment.

Full Stack Developer

Jul 2023 – Mar 2024

► Soft Solution · Tirana, Albania

- Delivered full-stack web solutions in W-language (WEBDEV) with polished UI and robust backend logic.
- Managed large production databases in SSMS ensuring data integrity, performance, and issue resolution.
- Designed and optimised SQL queries; integrated XML data sources across multiple formats.
- Participated in Agile / SCRUM delivery cycles, contributing to timely, high-quality releases.

◆ EDUCATION & CERTIFICATIONS

MSc Cyber Security & Resilience

FH St. Pölten UAS · Austria

2025 – ongoing

BSc Computer Sciences

University of Tirana · Albania

2021 – 2024

Languages

Albanian (native) · English (professional) · German (basic)

ASP .NET MVC — Udemy

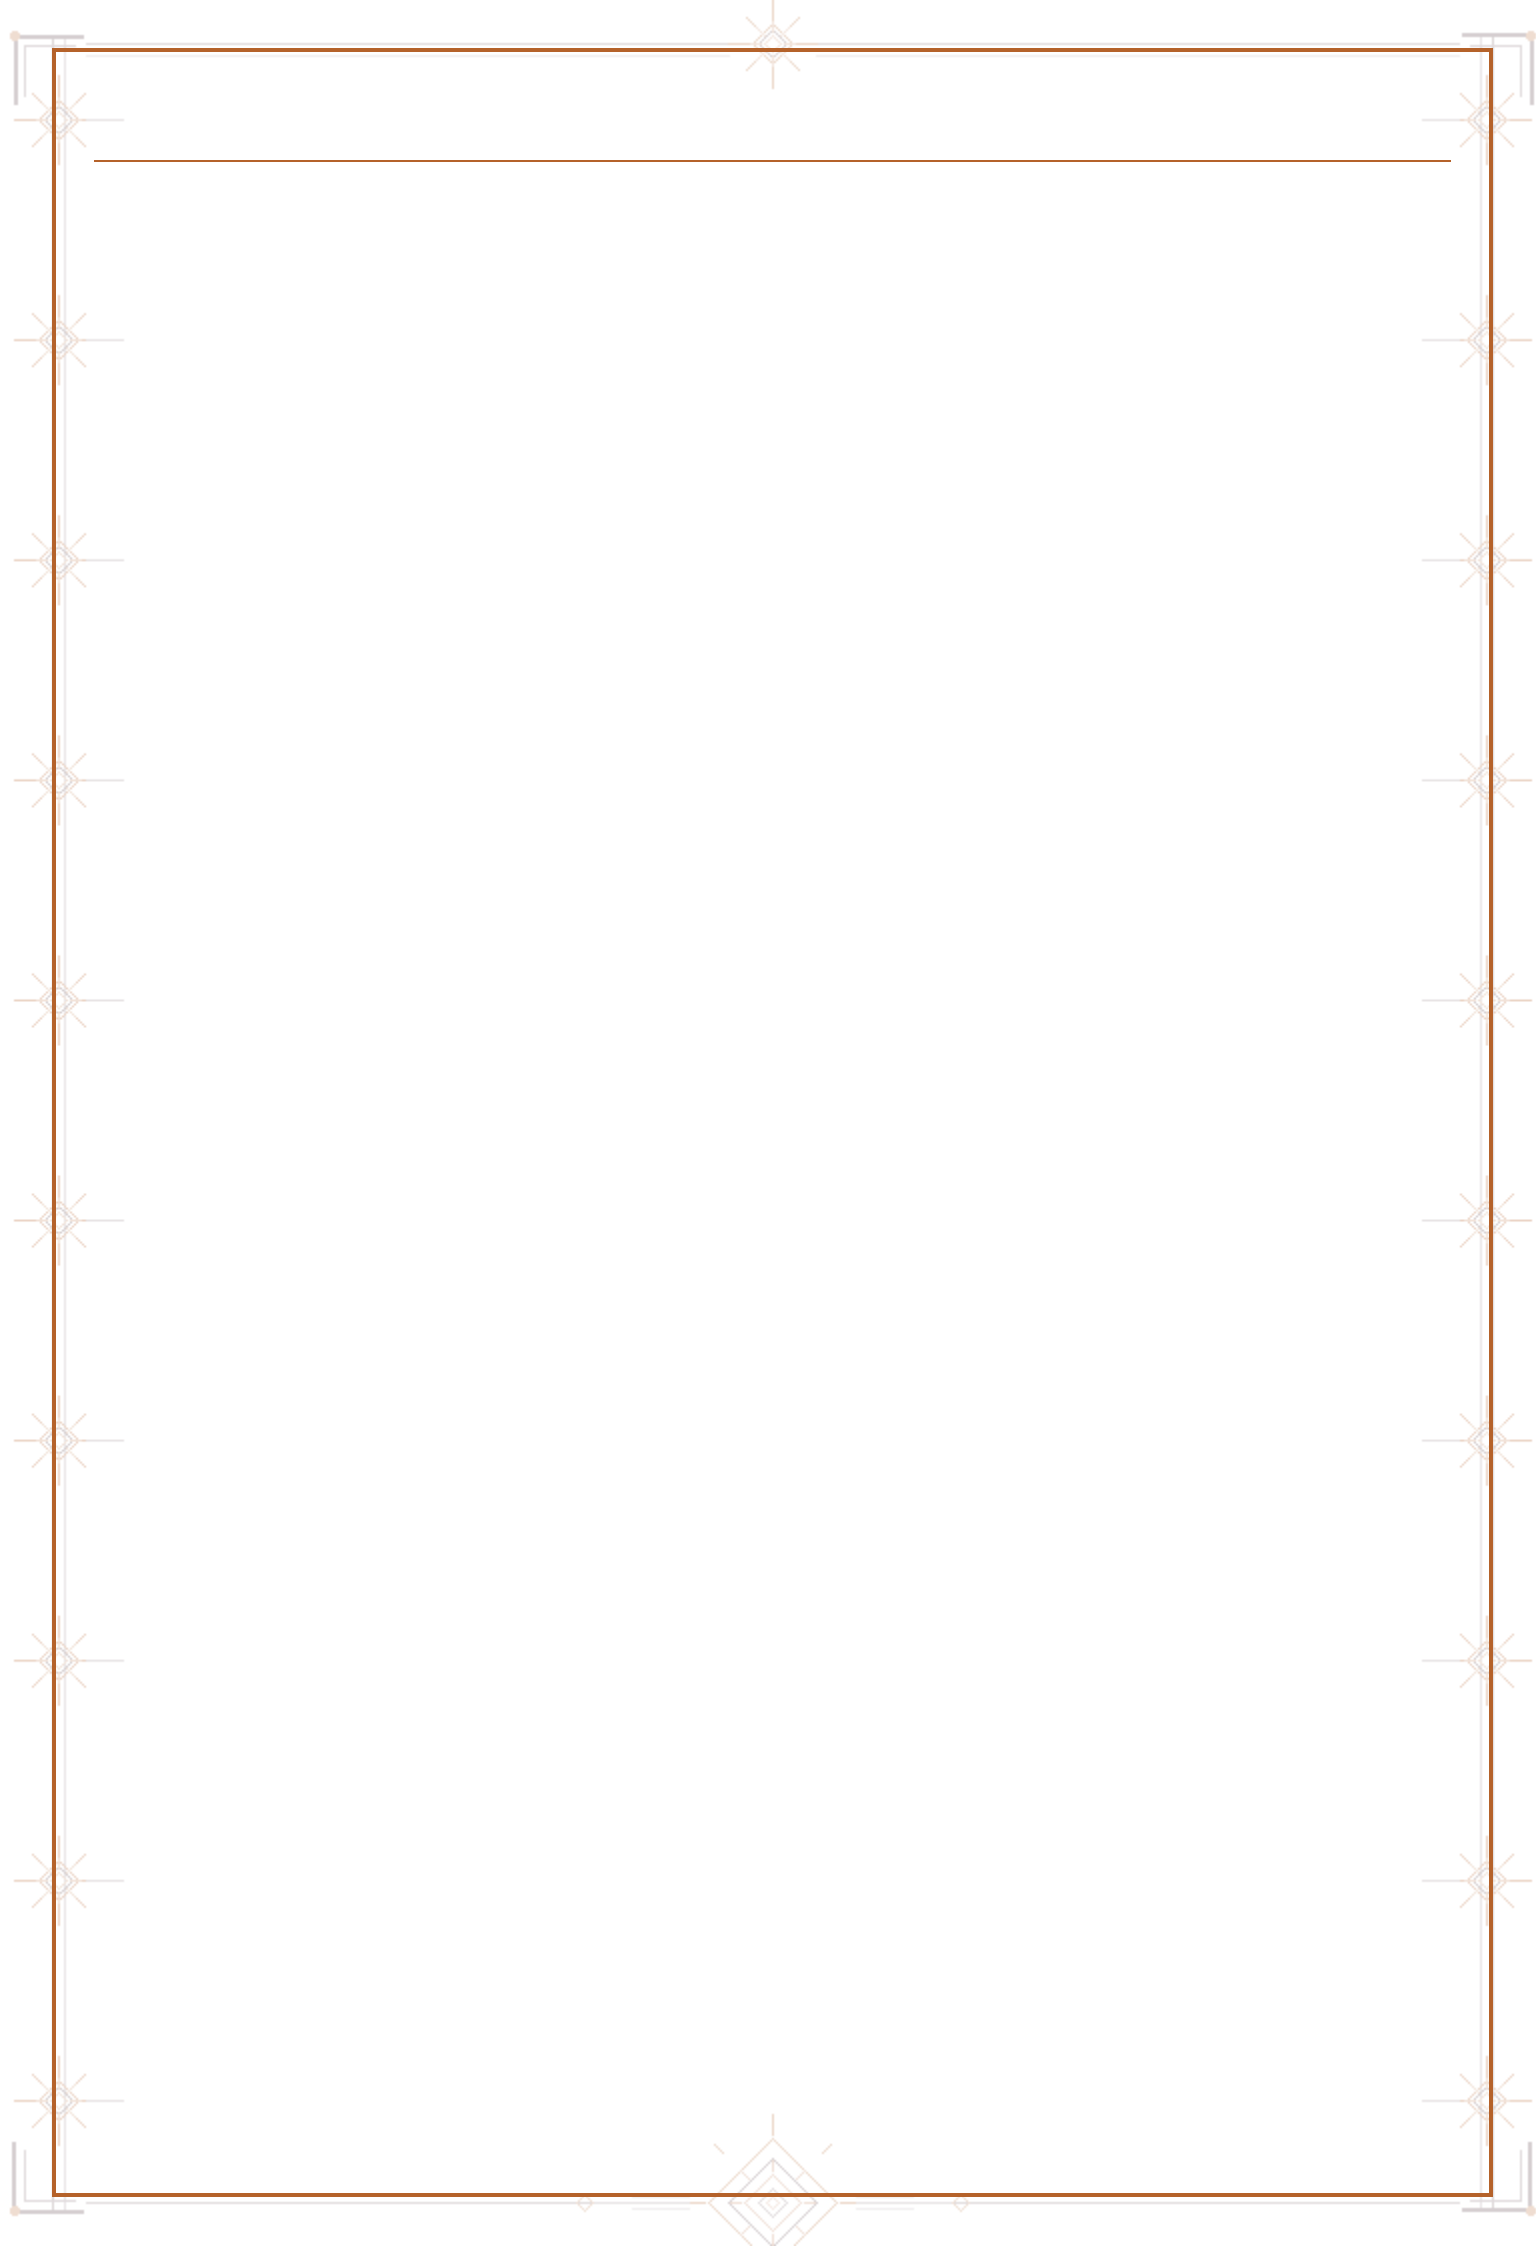

May–Jun 2024

Java Beg. & Int. — Tirana CoT

Sep 2022–Mar 2023

Python — ICT Academy

Jan–Apr 2021

◆ CYBERSECURITY PROJECTS

Infrastructure Penetration Testing Lab

Kali Linux · Nmap · Metasploit · Burp Suite · Hydra · SQLMap · MITRE ATT&CK · CVSS

- › Full pentest lifecycle against Linux/Windows labs; exploited SQLi, weak auth, insecure configs, SMB vulns.
- › Mapped to MITRE ATT&CK, scored via CVSS, produced professional pentest reports with remediation guidance.

Web Application Security Testing

Burp Suite · JWT · XSS · IDOR · Path Traversal · OWASP Top 10

- › Tested OWASP Top 10 against vulnerable apps; documented findings with severity ratings and mitigations.

Firewall, Proxy & Network Security Lab

Linux · nftables · Squid · VMware · NAT · TCP/IP

- › Segmented virtual enterprise networks; stateful firewall, NAT, DoS mitigation, Squid HTTPS proxying.

SIEM & Security Monitoring Lab

Wazuh · ELK Stack · EDR/XDR · SOC Workflows

- › Built SIEM for log collection, event correlation, alerting; simulated attacks to test detection coverage.

Threat Modelling — Mobile Banking App

STRIDE · DFDs · MITRE ATT&CK · Risk Assessment

- › Complete threat model with DFDs, trust boundaries, STRIDE analysis; full threat and mitigation documentation.

ISO 27001 Mock Audit & ISMS Documentation

ISO 27001 · 27002 · 27005 · CIS Controls v8

- › Mock internal audit; authored ISMS policies: classification, access control, business continuity.

Security Operations & Incident Analysis

SIEM · EDR/XDR · Windows Event Logs · PowerShell · Kill Chain

- › Analysed phishing, PowerShell abuse, lateral movement; mapped to Kill Chain stages.

PKI Implementation in C#

C# · .NET · OpenSSL · BouncyCastle · X.509 · RSA 4096

- › PKI with Root CA and server certs (RSA 4096/SHA-256); validated chains with custom trust stores.

Vulnerability Assessment & Reporting

OpenVAS · CVSS · Risk Assessment

- › Enterprise-like assessments; CVSS-scored findings with prioritised remediation reports.

Linux System Administration & Hardening

Ubuntu · nftables · Virtualisation

- › Lab systems: routing, firewall, packet filtering; system hardening and secure configuration.

Network Security & CCNA Practice Labs

Cisco · IPv4 · Routing · Switching · TCP/IP

- › IPv4, routing, switching, segmentation labs; foundational networking for SOC operations.
